Software Engineer | Frontend Specialist

Professional Summary *Software Engineer with a strong background in TypeScript and modern frontend ecosystems, including Vue, Nuxt, React, Next.js, Angular, Svelte and TanStack. Proven track record of delivering scalable, national-scale web applications (FGTS Digital) and leading technical decisions. Expert in leveraging AI-assisted coding and DevOps practices to accelerate delivery. As a former Technology Manager, I excel in asynchronous communication, self-guided work, and cross-functional leadership—core values for remote-first environments. MBA in Software Engineering.*

Professional Experience

Software Analyst & Frontend Developer | NHS | 2025–Present

- Spearheading frontend architecture using Vue 3 and Nuxt, focusing on building scalable, high-performance modules and ensuring seamless state management.
- Leading the adoption of AI-assisted coding tools, resulting in a significant reduction in bug density and faster sprint deliveries.
- Managing containerized environments (Docker/AWS) to ensure high availability and seamless CI/CD workflows.

Frontend Developer | Axon Technology | 2023–2024

- Built SvelteKit frontends for two manufacturing-management platforms — Andon (factory floor issue-alert system) and AxonNext (parts, technical drawings, and production-order management) — integrated with NestJS APIs and Keycloak SSO.
- Architected high-performance, accessible interfaces achieving 50% higher user engagement through UX optimization.

Frontend Developer | Serpro Brazil | 2021–2023

- Key contributor to **FGTS Digital**, a national-scale platform. Built ngx-dsgovbr, an Angular component library implementing Brazil's Federal Government Design System, reused across multiple Serpro products serving millions of citizens.
- Developed Angular frontends for FGTS Digital's collections system and for CNES, the national healthcare facility registry, applying rigorous testing standards for high-traffic government services.

Technology Manager | CWB Tecnologia | 2016–2020

- Led and mentored technical teams in an independent, self-guided environment.

- Orchestrated large-scale cloud migrations and infrastructure projects (AWS/Azure/GCP), focusing on security and cost-efficiency.

Technical Skills

- **Frontend:** Vue.js, Nuxt.js, **React, Next.js, Angular**, TypeScript, Svelte, TanStack.
- **Testing & Quality:** Jest, React Testing Library (Familiar), Clean Code, Technical Documentation.
- **Infrastructure & Remote Work:** Docker, AWS, Asynchronous Workflows, Git/GitHub, AI-assisted Development.
- **Soft Skills:** Autonomous Leadership, Strategic Problem Solving, Async Communication, Mentorship.
